## Declaration on REACH (EC) 1907/2006

ERIKS companies are committed to supplying our industrial customers with high-quality products that comply with relevant regulations. ERIKS products may originate from both within or outside the European Union. This declaration addresses compliance to the European Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Regulation (EC) No 1907/2006 (\*1), in short EU REACH.

To achieve compliance we execute the following for ERIKS push assortment sold by ERIKS companies located in the European Union.

- ERIKS Frame agreements with our suppliers with sections requiring EU REACH compliance
- ERIKS Code of Conduct for Business Partners
- ERIKS supplier portal with survey on product compliance topics, such as EU REACH compliance
- Additional supplier communications when e.g. EU SVHC updates are published

At present, we did not found, or did not receive information, that articles supplied by us contain substances...

- ...which have not been registered with ECHA in SCIP database,
- ...listed in EU REACH Annex XIV (\*2) for which no authorization was granted,
- ...in amounts higher than restricted for the usages as mentioned in EU REACH Annex XVII (\*3):
  - About PAH (polyaromatic hydrocarbon) substances restricted by REACH Annex XVII entry 50: Many rubber and plastic products contain carbon black, and carbon black contains PAH substances which are restricted under REACH Annex XVII entry 50 (\*4). ERIKS supplies rubber and plastic products which are, under normal or reasonably foreseeable conditions of use, not intended to come into direct as well as prolonged or short-term repetitive contact with the human skin or the oral cavity. In those cases the PAH restriction does not apply. If you have doubts whether the restriction applies to your usage, please check the REACH Annex XVII entry 50 (\*4)
- ...which are listed as EU REACH SVHC Substances of Very High Concern (\*5), with concentrations higher than 0.1%, besides:
  - Imidazolidine-2-thione [CAS number 96-45-7]: articles made of CR (polychloroprene rubber) may contain residual traces of imidazolidine-2-thione >0.1% due to the use of the substance as processing aid
  - Lead [CAS 743992-1]: articles made of lead or alloys containing lead, will contain >0.1% lead
  - DOTE [CAS 15571-58-1]: PVC piping products from Georg Fisher brand.
  - O,O,O-triphenyl phosphorothioate [CAS 597-82-0]: lubricants TITAN SINTOPOID LS 75W-90 and RENOLIT HI-TEMP 100 from Fuchs brand

### Validity

This declaration is valid for the EU REACH conditions valid on the date mentioned on this document, and created to the best of our knowledge. We do not declare the today valid regulation for items supplied in the past.
